

LEADING THE WAY IN WELLHEAD AND PIPELINE TECHNOLOGY

Wellheads Christmas Trees Gate Valves Surface Safety Valves Frac Trees Check Valves

OUR

Stream-Flo Industries Ltd. is committed to provide premium quality products and technical services on a timely and best value basis for the benefit of our customers and employees.

MISSION

Since 1962, Stream-Flo Industries Ltd. has provided engineering innovations for wellhead and pipeline operators supplying the oil and gas industry. Our wellhead, christmas tree, gate valve, frac tree, ESD, and check valve equipment provide leading-edge technology to meet the unique drilling, completion, production and pipeline requirements of customers around the world. Our Crown brand wellhead and gate valve line supports the complete range of high pressure, high temperature and critical service applications.

We design, manufacture, repair
the drilling and completion

**OUR
COMPANY**

and service products used in
of new oil and gas wells,

work-over of existing wells and production/transportation of oil and gas. We control the consistency and quality of our equipment by manufacturing the majority of our components at our 300,000 square foot plant in Edmonton, Alberta.

ERC Industries is a division of Stream-Flo Industries that is dedicated to satisfying the overwhelming demand of managing customer-owned equipment and its rental division. In stock is a complete range of API gate valves for resale from 2" 2000 psi through to 5 1/8" 15,000 psi. To complement our valve repair, ERC has a complete inventory of remanufactured wellhead equipment and parts for most Canadian and US manufacturers.

wellhead

Stream-Flo supports our customers through product innovation and an ongoing commitment to product development and intellectual property. Stream-Flo's patents cover a wide range of products and applications including valves, drilling and completion equipment.

Products

- casing heads
- casing hangers
- primary packoffs
- tubing heads
- secondary packoffs
- tubing hangers
- tubing head adapters
- composite pumping trees

Specification Compliance

- ISO 9001
- API 6A & Q1
- NACE MR0175

Trims

- sweet/general
- sour/NACE
- CO₂
- water flood
- corrosion-resistant alloys
- coatings
- clad and inlays

Temperature Range

- -75° to +650° F
(-60° to +345° C)

Applications

- thermal systems
- artificial lift systems
- conventional
- custom designs
- composite pumping tree
- full bore drilling system
- conductor-sharing wellheads
- CBM
- critical sour service

Connections

- flanged
- threaded
- studded
- clamp-hub
- slip-on weld
- union
- slip lock
- quick connectors

Pressure Ratings

- 2000 - 20,000 psi

gate valve

Stream-Flo's Crown gate valve products feature a full bore/thru-conduit design, in-line repairability and protected long-life seats. Our gate valves are designed for all types of applications including wellhead, christmas tree, frac tree, ESD, and choke and kill manifold systems. Our models can be equipped with single or double-acting hydraulic or pneumatic actuators with manual override and fail-safe closed or open systems.

Gate Designs

- solid slab
- parallel expanding
- split
- ESD systems
- actuated

Body Designs

- cast
- forged
- composite
- recessed

Applications

- sweet/sour oil and gas
- artificial lift systems
- injection
- thermal
- electrical submersible pumps
- surface safety valves
- critical service HPHT

Pressure Ratings

- API 2000-15,000

Trims

- sweet/general
- sour/NACE
- CO₂
- water flood
- corrosion-resistant alloys
- coatings
- clad and inlays

Temperature Range

- -75° to +650° F
(-60° to +345° C)

End Connections

- API flanged
- threaded
- clamp-hub
- union

Specification Compliance

- ISO 9001
- API 6A & Q1
- NACE MR0175

checkvalve

Products

- swing check
- piston check
- wafer check
- wafer nozzle check
- Crown-Europa nozzle
- actuated
- subsea

Trims

- carbon steel
- stainless steel
- patented exotic alloys
- ductile iron
- duplex steel

Applications

- oil and gas pipelines
- wellhead injection lines
- gas export facilities
- product tank farms
- gas storage caverns
- field gathering systems

Temperature

- -75° to +650° F
(-60° to +345° C)

Options

- removable seat
- conduit clapper
- weld overlay
- exotic seals
- fire-safe designs
- slam retarders
- position indication

Pressure Ratings

- ANSI 150-2500
- API 2000-10,000

Connections

- raised-face
- RTJ flanged
- weld end
- socket weld
- threaded
- union
- proprietary

Sizes

- 1/2" - 48"
